

Simon Caidan

Director Safety, Health and Sustainability
The Francis Crick Institute, London

Simon Caidan's health and safety experience spans three decades and has recently culminated in the realisation of The Francis Crick Institute - London's newest, and Europe's largest, biomedical institute.

Simon worked with the design team right from the early stages to make sure ambitious plans for a state of the art research facility could be safe and compliant with legislation covering everything from the use of genetically modified organisms to the use of radioactive materials. Simon acts as the Radiation Protection Advisor and Radioactive Waste Advisor to the Crick.
