

We combine immersive film and live drama, live action, facilitated discussion & skills practice. Our bespoke experiential training elicits behavioural change. People glean a deep, lasting awareness of their responsibility at work plus the communication tools to make a difference. We create bespoke environments, or mobile 'pop-up' training experiences. We deliver anywhere: offices, construction sites, conference centres, hotels.

Programmes are authentic, bespoke, deeply effective.

We deliver our training across the globe. We created, and run the groundbreaking site-specific EPIC induction project for Tideway London. Combining live drama, film, custom-built sets, and facilitated workshops we explore themes and behaviours witnessed during the initial, theatre-based experience.
